

FileBox v.3.0

Megasoft2000 Ltd.

Palm Software Division (PSD).
Ulyanovsk,
Russia.

Platform: Palm OS 3.0, 3.1, 3.3, 3.5, 4.0

System description.

The FileBox utility allows to transfer PC files of different extension to the Palm for storing with further transferring all files of the Palm FileBox application back to the PC. In order to save the memory, the Palm contains the option for compressing the files transferred to the Palm.

The FileBox Desktop installed on PC helps select, compress and prepare the files chosen by you for transferring to the Palm. The FileBoxManager allows to determine the directory for transferring the files to the Palm and for receiving the files transferred from the Palm.

System installation.

If you have FileBox v.2.x :

1. Uninstall FileBoxManager v.2.x (PC)
2. Delete FileBox.prc v.1.0/2.0 (Palm)

Installation.

Before installing get sure, that you use HotSync Manager v. 3.1.0 and higher (in other case FileBox won't work on your PC)

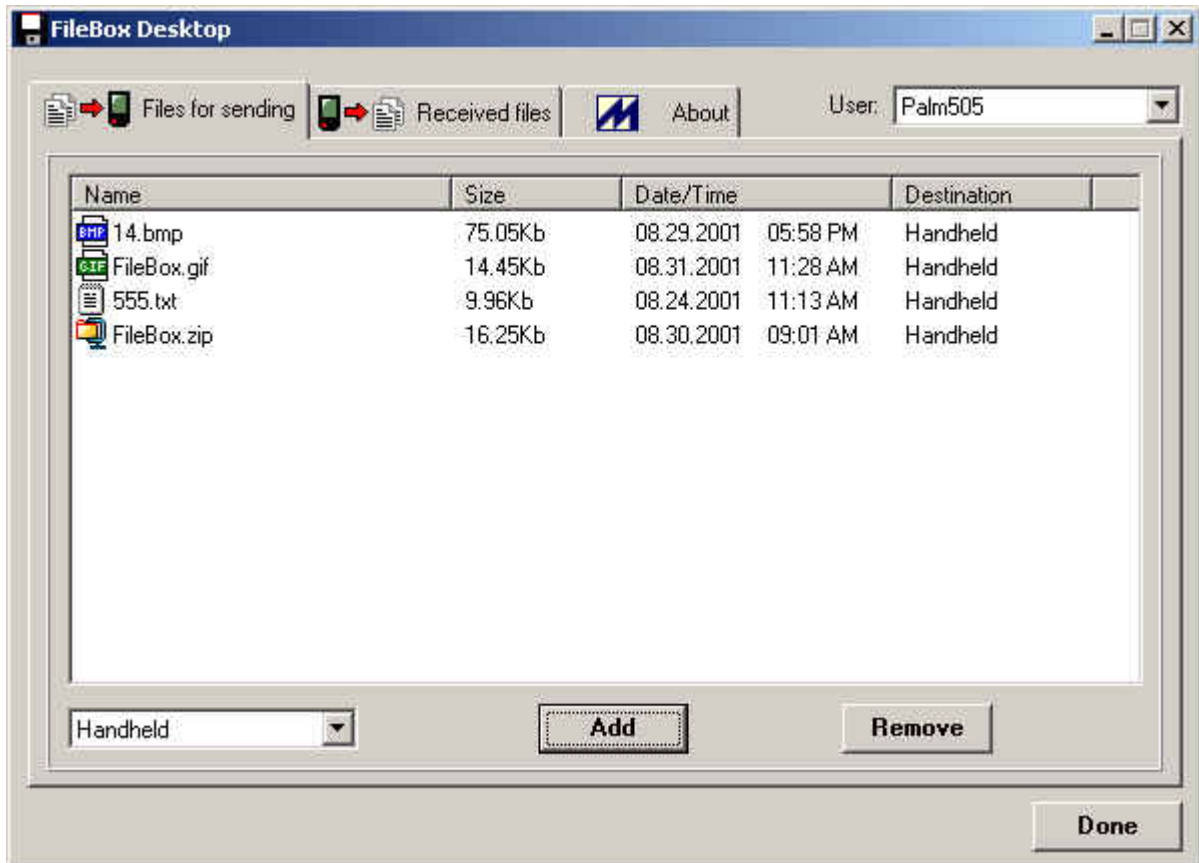

Run "Setup.EXE".

To install FileBox.prc: Start/Programs/FileBox/FileBox for Palm (synchronize your device afterwards).

For starting FileBox Desktop: Start/Programs/FileBox/FileBox Desktop.

FileBox Desktop (PC) operation:

1. Files for sending.

Choose the name of the device you want to transfer files to. (User:)

To choose the files to be transferred to your device press the "Add" button.

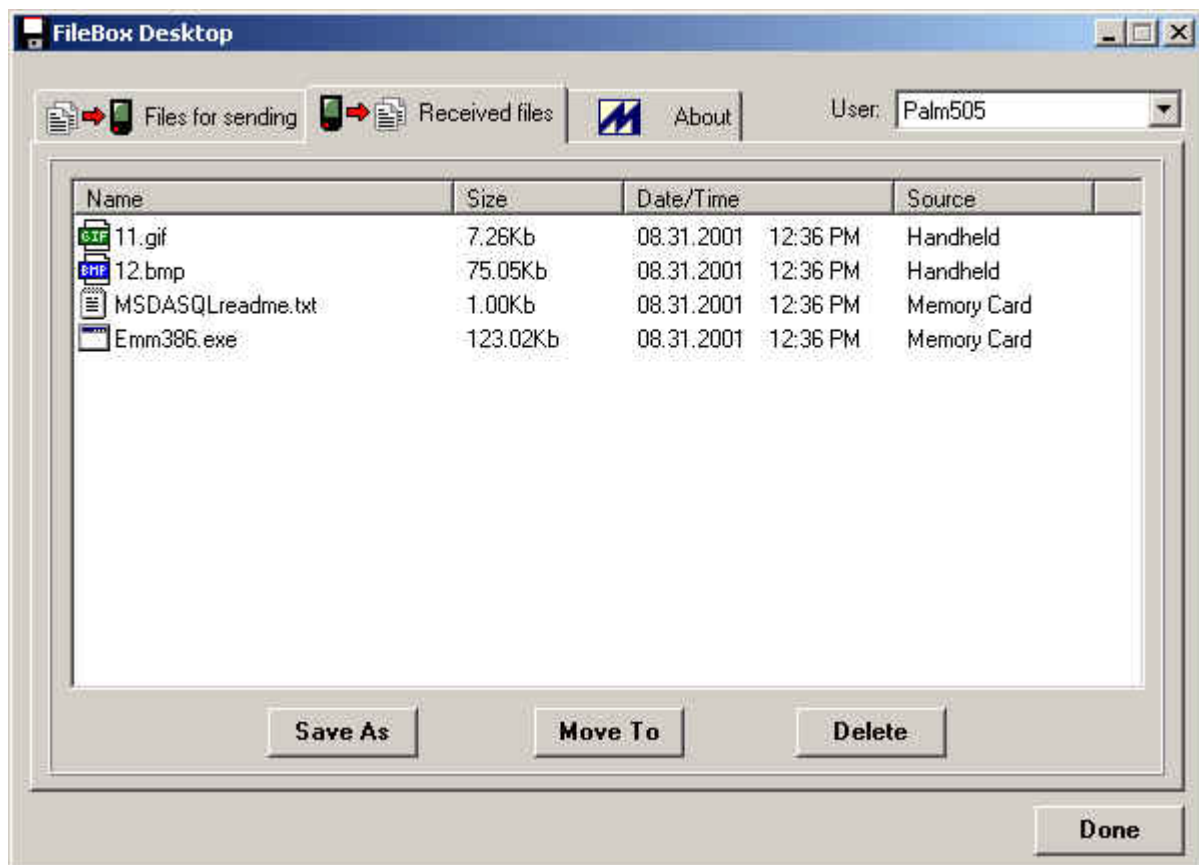

All the chosen files can be transferred to:

- HandHeld
- Memory Card (SD/MMC)
- Both

You can choose any file or a group of files and state the address you want to transfer them (HandHeld, Memory Card, Both).

To delete any file from the list you are to choose this file and press the "Remove" button. Press the "Done" button and synchronize your device. All the file list will be transferred to your device. Start FileBox.prc on your device and you will see the file or the group of files that have been transferred to your device after the last synchronization.

2. Received files.

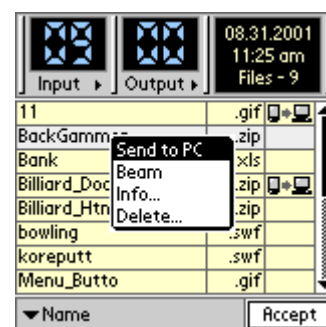

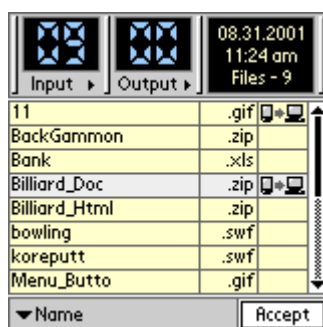

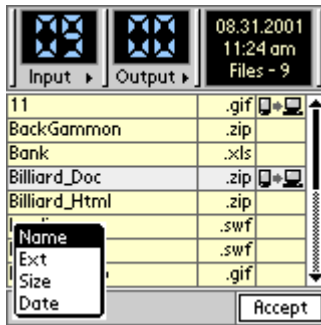

Here you can manage the files that have been transferred from your device to PC. To do that, choose the file or the group of files and press the "Save As" or "Move To" buttons. To delete a file, choose it and press the "Delete" button.

When finished, press the "Done" button.

FileBox (Palm) operation:

All the actions and operations are done after tapping the required file in this program. After that the menu appears. Here you can choose all the possible functions to work with the file. Example: If you choose the "Send to PC" function, the symbol of file transfer to PC will appear in the file field. To cancel the action choose the "Send to PC" function again. After choosing all the files that are to be transferred to PC press the "Accept" button and synchronize.

The following context menu enables to sort files according to the following characteristics:

- Name
- Extension
- Size
- Data

There are three figure indicators in the upper window.

1. Input - shows the number of files that have been transferred to your device after the last synchronization. For further details about this file list press the indicator (see the right image)

2. Output - shows the number of files that have been transferred to your PC from your device after the last synchronization. For further details about this file list press the indicator.

3. The third window contains the information about the current date, time, the total amount of files, that are on FileBox (Palm)

Input files	
11:23 am, 08.31.2001
